DETAILED ACTION

Claims 1-20 are pending.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-4, 7-10, drawn to a polypeptide kinase, a polynucleotide, a vector, and a host cell encoding therefor, and a method for expression thereof.

Group II, claims 5 and 6, drawn to an antibody to a polypeptide kinase.

Group III, claim 11 drawn to a method for designing an inhibitor of a polypeptide kinase.

Group IV, claims 12-15, drawn to a method for testing a compound for modulation of a polypeptide kinase.

Group V, claim 16-20, drawn to a method for inhibiting a polypeptide kinase by blocking binding of the kinase to a substrate.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons. The polypeptide of Group I and antibody of Group II do not share a special structural or functional feature; they are distinct chemical entities. The methods of Groups III-V do not share any special technical feature with the antibody of Group II. In addition, the methods of Groups III-V and do not have unity of invention with Group I, as

Art Unit: 1652

Group I already includes a method of use of the kinase polynucleotide, which comprises unrelated steps to the methods of Groups III-V, and 37 CFR 1.475 does not provide for the inclusion of multiple methods of use within the main invention

Restriction between product and process claims has been required. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the Official Gazette notice dated March 26, 1996 (1184 O.G. 86; see also M.P.E.P. 821.04, *In re Ochiai*, and *In re Brouwer*). Process claims that depend from or otherwise include all the limitations of the patentable product will be entered as a matter of right, if the amendment is presented prior to final rejection or allowance, whichever is earlier. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. To be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
